Official Event of the  
Austrian Presidency  
of the Council of the  
European Union

## Renewable Heating and Cooling in Integrated Urban and Industrial Energy Systems

**3 – 5 October 2018**  
**Congress Graz**  
**Austria**

Conference Program

In order to implement the agreement on global warming reached at the UN climate change conference in Paris, in December 2015, an almost complete phasing out of fossil energy supply is required by 2050. This presents enormous challenges for society, but also offers a lot of opportunities for research and industry to make a global contribution to this change.

The International Sustainable Energy Conference - ISEC 2018, organized by AEE INTEC, sees itself as a promoter of innovative ideas in the areas of renewable energy systems and resource efficiency, and is intended to be a forum for research, industry and energy policy. With this ISEC 2018 intends to contribute to the challenges as described above.

The organizing committee warmly welcomes you to ISEC 2018 in Graz. A special welcome to the international delegates who join us from across the globe – your presence and contributions to the conference enriches our gathering and ensures that ISEC 2018 is a meeting point for the international exchange of ideas.

We are also very pleased that this conference is one of the official events of the Austrian EU Presidency as it shows the importance of the conference topics.

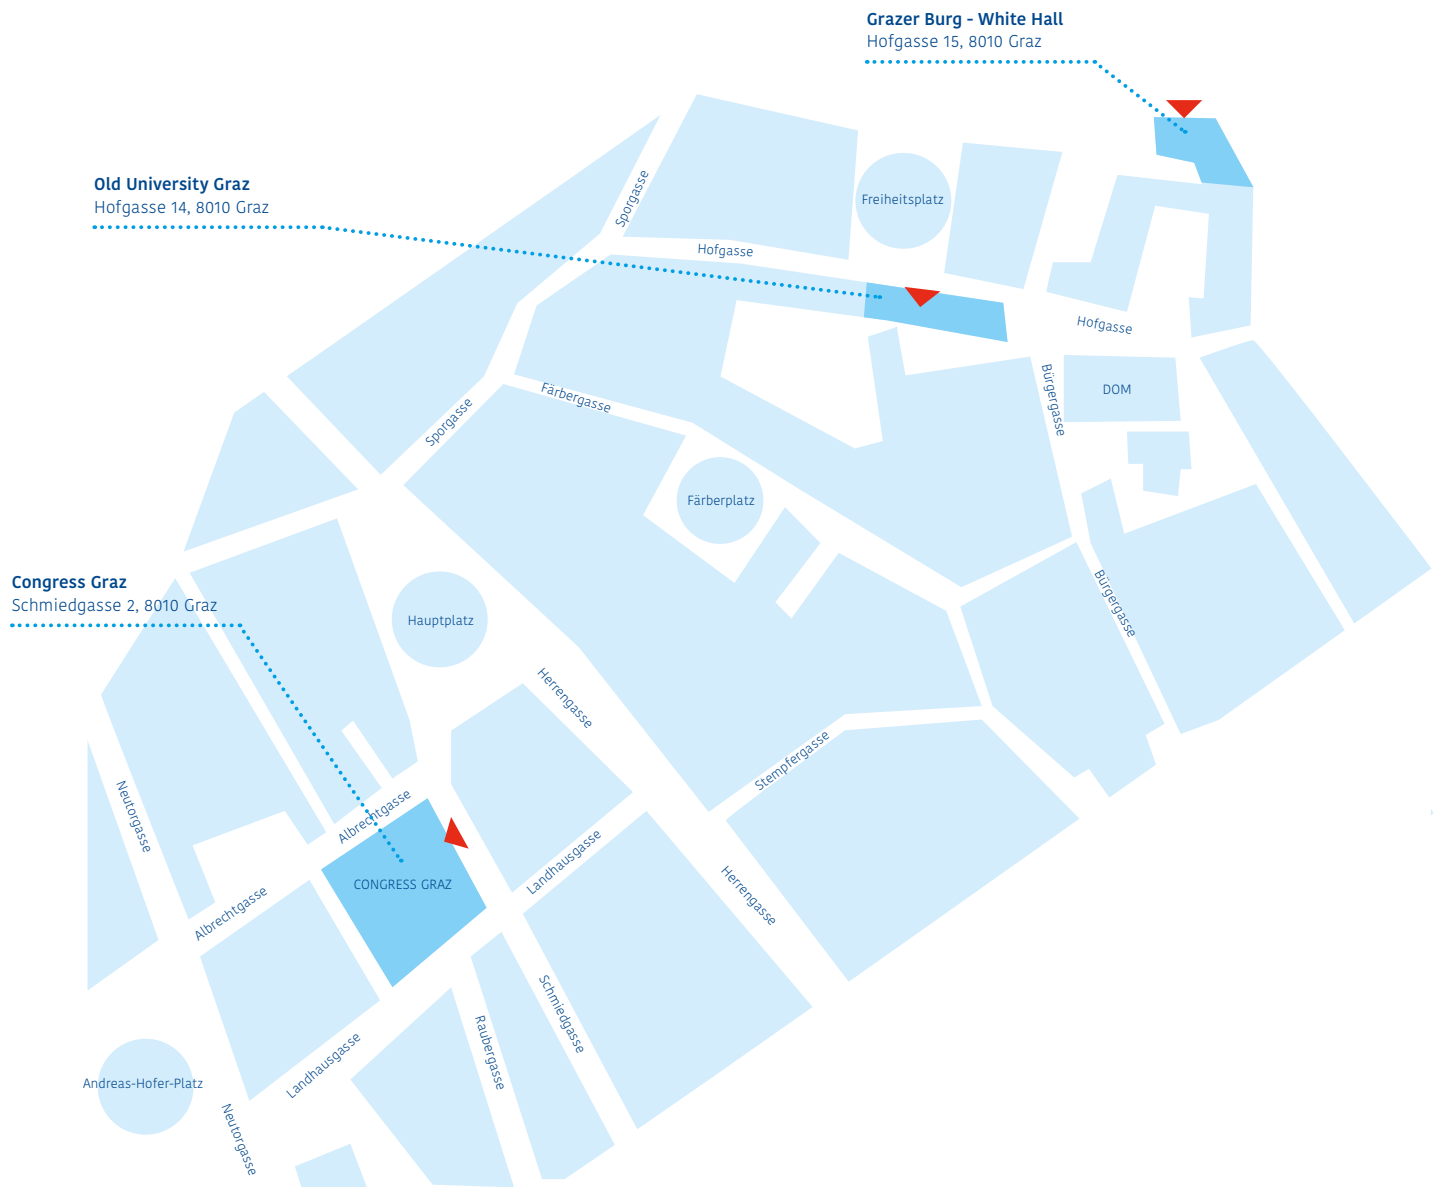

We wish you an enjoyable visit to the city of Graz, inspiring and forward-looking keynote speeches and lectures as well as the establishment of new linkages with researchers, representatives from industry and energy policy.

**Werner Weiss**

Conference Chair

## Venue

## Conference fees

ISEC 2018 - conference fee	Standard fee Regular	Standard fee Early Bird (until 30 July)	Reduced fee Regular	Reduced fee Early Bird (until 30 July)
3 days	570,-	500,-	530,-	480,-
2 days	460,-	400,-	420,-	380,-
Single days	340,-	300,-	320,-	290,-
Student per day (limited number)	80,-			
Conference dinner 4 October 2018	Included; accompanying person EUR 50,-			

Please register at our conference management system

Wednesday, 3 October 2018

09:00 am	<b>Registration</b> at Grazer Congress, Schmiedgasse 2, 8010 Graz
10:00 am	<b>Technical Tours</b>
07:00 pm	<b>Welcome Reception</b> White Hall of "Burg", Hofgasse 15, 8010 Graz

## Technical Tours

### Tour 1 – Main focus on sustainable buildings and new districts

**Smart City Wagner Biro & Science Tower** - The planned and partially implemented Smart City Mitte - whose centre is the „Science Tower“ - will be a district with the highest quality of life and uses the latest technologies for the implementation of an energy-efficient and resource-efficient urban district development.

**MED Campus** - The high requirements of sustainability in terms of economy, functionality, added value and ecology were excellently implemented on more than 40,000 m<sup>2</sup> GFA for teaching, ie. lecture theaters and seminar rooms, offices and laboratories.

**Liebenauer Main Road** – Renovation with multifunctional façade elements

**Primary school Mariagrün** - Austria's first elementary school in passive house (AA+) quality in this size. This school is a pioneer in school construction - learning rooms are designed in the „cluster“ system.

### Tour 2 – Main focus on industry, waste heat recovery and district heating

**Roto Frank** - Roto Frank AG produces turn-tilt hardware systems for windows and balcony doors and offers roof windows, solar panels and attic stairs. Roughly 4,500 people work in a total 17 production plants and over 40 sales offices of the Roto Frank AG. The main focus of the factory in Kalsdorf near Graz is the production of hardware systems for windows and balcony doors.

In Kalsdorf AEE INTEC is operating a pilot plant of membrane distillation for recovery chemicals as well process water. With this innovative separation technology appr. 60% of chemicals and 90% of water can be recovered.

**SAPPI – inquired** - Sappi is a paper mill situated in Gratkorn. The Gratkorn Mill produces 980,000 t of high-quality double and triple coated papers annually which are used for premium quality publications all over the world. Since autumn 2017 industrial waste heat from the paper mill is used to heat 18,000 households in the city of Graz. The heat is fed into the city's existing district heating system by new underground pipes. At a temperature of up to 120°C and a power of 35 MW, approximately 15% of the cities total district heating demand can be covered by the usage of waste heat.

**HELIOS project in Graz-Neufeldweg** - Multifunctional use of a 2.500m<sup>3</sup> heat storage connected to the district heating network of Graz. CHP plant based on repository gas, 2.000m<sup>2</sup> ground mounted solar thermal collector field and a power to heat installation.

Waste heat based heat pump project of the steel mill **Marienhütte in Graz**: Two large scale heat pumps with a thermal power of 11,5MW feed in a low temperature district heating network (68°C) as well as in the main district heating network of Graz (with up to 95°C).

## Welcome Reception

Welcome by **Prof. Dr. Hans Schnitzer**, Director of the board, AEE INTEC, AT

Welcome by **Governor Hermann Schützenhöfer**, Province of Styria, AT

# Thursday, 4 October 2018

STEIERMARK HALL				
08:00 am	<b>Registration</b>			
<b>WELCOME SESSION</b>				
09:00 am	Session Chair: <b>Prof. Dr. Reinhold W. Lang</b> , JKU Linz, AT <b>Werner Weiss</b> , Managing Director, AEE INTEC, AT <b>Josef Plank</b> , Secretary General, Federal Ministry for Sustainability and Tourism, AT <b>Michael Paula</b> , Federal Ministry for Transport, Innovation and Technology, AT <b>Theresia Vogel</b> , Director, Austrian Climate and Energy Fund, AT			
<b>KEY-NOTES</b>				
09:30 am	The European energy future <b>Dominique Ristori</b> , Director General, DG Energy, European Commission, BE (inquired) Design of future energy systems towards 100 % renewables <b>Prof. Dr. Hans-Martin Henning</b> , Director, Fraunhofer ISE, DE			
10:20 am	<b>Coffee break</b>			
<b>PARALLEL SESSIONS</b>				
	STEIERMARK HALL	HALL 1	HALL 2	HALL 3
10:50 am	<b>Innovations for the decarbonization of buildings and districts</b>	<b>Spatial energy planning with focus on renewable energies</b>	<b>Energy efficiency, process intensification</b>	<b>Renewable cooling in a future energy system</b>
	Session Chair: <b>Anita Preisler</b> teamgmi Ingenieurbüro, AT	Session Chair: <b>Theodor Zillner</b> BMVIT, AT	Session Chair: <b>Prof. Dr. Andrzej Stankiewicz</b> University Delft, NL	Session Chair: <b>Prof. Dr. Horst Steinmüller</b> Linz University, AT
10:50 am	LCC analysis of a Swedish net zero energy building – optimizing LCC including co-benefits <b>Björn Berggren</b> Skanska Sverige AB, SE	Method for integrated strategic heating and cooling planning on regional level – the case of Brasov <b>Richard Büchele</b> Technical University Vienna, AT	Decarbonizing industry: Extending the scope of mitigation options <b>Dr. Andrea Herbst</b> Fraunhofer ISE, DE	Solid oxide fuel cell combined cooling heat and power using renewable fuels for a sustainable and highly efficient energy supply <b>Michael Seidl</b> AVL, AT
11:05 am	Creation of hybrid simulation model <b>Werner Lerch</b> Graz University of Technology, AT	Digital approach for spatial energy planning – best practice in Switzerland <b>Gabriel Ruiz</b> Navitas Consilium SA, CH	Oscillatory flow bioreactor for continuous bio-processing with low temperature heat supply <b>Dr. Bettina Muster</b> AEE INTEC, AT	Façade-integrated decentralized cooling system - evaluation in an outdoor test facility <b>Dr. Daniel Brandl</b> Graz University of Technology, AT
11:20 am	Vitality - design rules for building integrated photovoltaics in the early project development stage <b>Tim Selke</b> AIT Austrian Institute of Technology, AT	How combined spatial energy planning, simulation and stakeholder integration lead to sustainable district heating systems <b>Dr. Ingo Leusbrock</b> AEE INTEC, AT	Energy efficiency and flexibility for urban industrial production sites through integration of ground source heat pumps (GSHP) <b>Ivan Bogdanov</b> Fraunhofer IPA, DE	Performance investigation of a desiccant assisted solar and geothermal air conditioning system during winter and summer <b>Peter Niemann</b> University of Technology Hamburg-Harburg, DE

07:30 pm **Conference Dinner**

Venue: Old University, Hofgasse 14, 8010 Graz  
 Welcome by **Werner Weiss**, Conference Chair, AEE INTEC  
 Welcome by the city of Graz  
 Dinner speech: **Beyond Growth** - Economics as if the planet mattered  
**Prof. Dr. Mark T. Brown**, Department of Environmental Engineering Sciences, University of Florida, Gainesville, USA  
 Best Poster Award presented by **Nigel Cotton**, European Copper Institute, BE

# Friday, 5 October 2018

## STEIERMARK HALL

08:30 am **Networking coffee**

### KEY-NOTES

09:00 am Session Chair:  
**Christoph Brunner**, AEE INTEC, AT  
Research needs for the decarbonization of Europa's Industry – SPIRE's perspectives  
**Dr. Christoph Sievering**, Head of Energy Policy at Covestro, DE

09:25 am Renewable energy is the answer... but what was the question?  
Do planners design for people's needs?  
**Dr. Wolfgang Kessling**, TRANSOLAR Energietechnik GmbH, DE

10:00 am Renewable heat policies - delivering clean heat solutions for the energy transition  
**Ute Collier**, IEA Paris, FR

10:20 am **Coffee break**

### PARALLEL SESSIONS

	STEIERMARK HALL	HALL 1	HALL 2	HALL 3
10:50 am	<b>Future role of buildings for the flexibility and stability of thermal and electric grids</b>	<b>Urban district heating and cooling technologies</b>	<b>Energy and resource recovery from waste water treatment plants sources</b>	<b>Geothermal technologies</b>
