

# European Technology and Innovation Platform on Renewable Heating and Cooling

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 825998. **Disclaimer:** The sole responsibility for any error or omissions lies with the editor. The content does not necessarily reflect the opinion of the European Commission. The European Commission is also not responsible for any use that may be made of the information contained herein

- **Launched during the Geotherm Offenburg – March 2019 & expected to be finished in October 2019**
- **Extremely important to see our ideas being supported by the funding agencies (specifically EU program Horizon Europe 2021-2027)**
- **Follow-up meeting during EGC-Den Haag and several video-conferences**
- **A group of several experts + EGEC staff participating in the drafting**
  - **Process is completely open for participation / every member of the GeoPanel is called to participate**

- **MAIN HIGHLIGHTS about the new SRIA**
  - **Distinction between Shallow and Deep is not longer kept**
  - **Emphasis on demand side aspects is strong**
  - **Three parts with several topic each:**
    - **Production and Resource Management**
    - **System integration issues**
    - **Innovation for the removal of non-technical barriers**

**New draft version available online**

**Webinar to discuss the last draft and  
validate the SRIA**

**End of October: launch editing and  
formatting work**

**Final release of the SRIA before end 2019**
