

European workshop on renewable residential heating

Date: 11 December 2019

**Place: RWTH International Academy, room "Orange"
Campus Boulevard 30, Aachen/DE**

We are pleased to invite you to our international workshop at the RWTH International Academy in Aachen, Germany. The workshop is the final event of the HORIZON2020 European research project *Residue2Heat* "Renewable residential heating with fast pyrolysis bio-oil".

Objectives

We will present the main achievements of the project and will reflect on the lessons learned in relation to renewable residential heating with fast pyrolysis bio-oil (FPBO). Together with the representatives of the residential heating industry and its associations, we would like to foster the exchange of the newest scientific and technical results between industry, researchers, and experts. Challenges and opportunities faced by the renewable residential heating sector in Europe will be discussed.

Target audience

Industry representatives for renewable residential heating and its national and international associations, policy makers, experts from academia and research institutions, and everyone interested in renewable residential heating in a broad sense.

Preliminary schedule

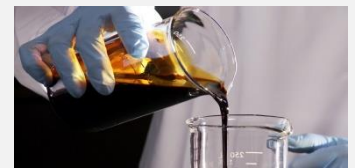

- 8:30 Registration
- 9:00 Welcome and presentation of the *Residue2Heat* project
FPBO production, modelling, combustion, environment, standardization
Coffee break & poster presentations
- 11:00 Energy for tomorrow in the residential heating sector
Lunch
- 13:00 Industrial opportunities for residential heating
Coffee break & poster presentations
- 15:00 Future needs for residential heating
- 16:00 Conclusions & outlook
- 16:30 Champagne reception for individual networking and discussions

Registration until 03.12.19

Registration is requested with full name, affiliation, and country. For registration and further information please contact us by email at:
